

Precision Machining & Manufacturing Support from Our Central Texas Location

At CAB Worldwide LLC, we go beyond traditional job shop services—we're a machining, fixturing, and error-proofing team of experts dedicated to helping you optimize your domestic manufacturing capabilities.

From precision CNC machining to custom fixturing and process reliability, our experienced team in Nacogdoches, Texas is ready to support your production needs.

If you're looking for more than just a machine shop—and you need a true partner in improving manufacturing performance—CAB Worldwide is here to help. Let's discuss how our team can support your machining and production goals.

Expert Machining Solutions

Precision CNC lathes and mills for complex and medium-size production runs.

Fixturing & Error Proofing

Tailored solutions to improve consistency, reduce scrap, and streamline your operations.

Comprehensive Quality Assurance

CMM inspection ensures accuracy and reliability in every part we produce.

A Skilled, Solutions-Focused Team

Decades of experience tackling manufacturing challenges with practical, cost-effective approaches.

Strategic Central Texas Location

Our Nacogdoches, Texas facility provides efficient access to key transportation routes for smooth logistics and fast turnaround.

Whether you require U.S. machining from domestically poured steel or a solution that combines U.S. machining with foreign semi-finished castings or forgings, CAB delivers a comprehensive, expertly crafted solution. With our extensive experience and deep industry expertise, we ensure a seamless, reliable supply chain tailored to your specific needs.
